

COMPANY OVERVIEW

Strata Security is an engineering-first cybersecurity company specializing in secure software, application security, DevSecOps, vulnerability research, mobile security, cloud security, and defensive engineering. The company operates two practice areas on a single engineering foundation — a Commercial application security assessment platform and a Federal Security Services practice — both delivered directly by the technical practitioners responsible for the work. Federal engagements emphasize security engineering, modernization, and long-term technical partnership for mission-focused and high-assurance programs.

CORE COMPETENCIES

Secure Software Engineering

Security built into the SDLC, not layered on after release

DevSecOps

Security controls embedded into CI/CD pipelines

Mobile Security

Hands-on assessment beyond automated scanning

Defensive Engineering

Controls that reduce attack surface by design

Application Security

Architecture review and vulnerability assessment

Vulnerability Research

Structured analysis of complex or opaque software

Cloud Security

Configuration and architecture review

DIFFERENTIATORS

- **Engineer-Led Delivery** — the practitioner who scopes an engagement performs it; no account-management layer.
- **Builds Software, Not Only Advisories** — designs and operates a live security assessment platform.
- **Reverse-Engineering Depth** — direct experience analyzing real software, not only reviewing documentation.
- **Research-to-Delivery Pipeline** — offensive research and defensive engineering treated as one connected discipline.

TECHNICAL EXPERTISE

Reverse Engineering & Binary Analysis

Static & Dynamic Application Testing

Secure SDLC Integration

Threat Modeling & Architecture Review

Mobile & Embedded Assessment

Cloud Configuration Review

INDUSTRIES SERVED

Federal Civilian Agencies

Department of Defense Programs

Intelligence Community Programs

Prime Contractors & System Integrators

Mission-Focused Commercial Enterprises

Positioned to support the sectors above; specific program experience available on request.

AT A GLANCE

Leadership	Founder-led
Delivery Model	Direct practitioner
